

INT.

Axis Bank
#DigitalSuccess Stories

PayPro mobile app to support secure and authenticated mobile transactions.

Axis Bank has always been one of the leaders in providing excellent banking service to its customers. The Bank wanted to provide an intelligent and intuitive corporate banking solution for its users. The bank approached INT. for developing a secured corporate Mobile App.

About The Client

Industry

Banking Services

Headquarters

Mumbai, India

Website

<https://www.axisbank.com>

Axis Bank is the third-largest private sector bank in India. The bank has more than 3000 branches in India and the world's leading financial metropolises like Dubai, Hong Kong and others.

The bank specialises in wholesale, retail and corporate banking services. In 'India's Best Banks' 2012 survey, Axis Bank was awarded as 'Consistent Performer'.

The Problem Statement

- Axis Bank wanted to build a Mobile App that can provide the financial institution a competitive edge over their competitors. A UI and UX equipped FinTech for money transfer, savings and investment products.
- A safe and secure encrypted data structure was also required by the bank. The Mobile App needed to be accessed in both Android and iOS phones.
- The App streamlined corporate financial activity and B2B communications.

Business Solution

Technology Stack

ECS

VMware

JIRA

ZENDESK

JENKINS

VOIP

Atlassian Bamboo

iOS and

Android App

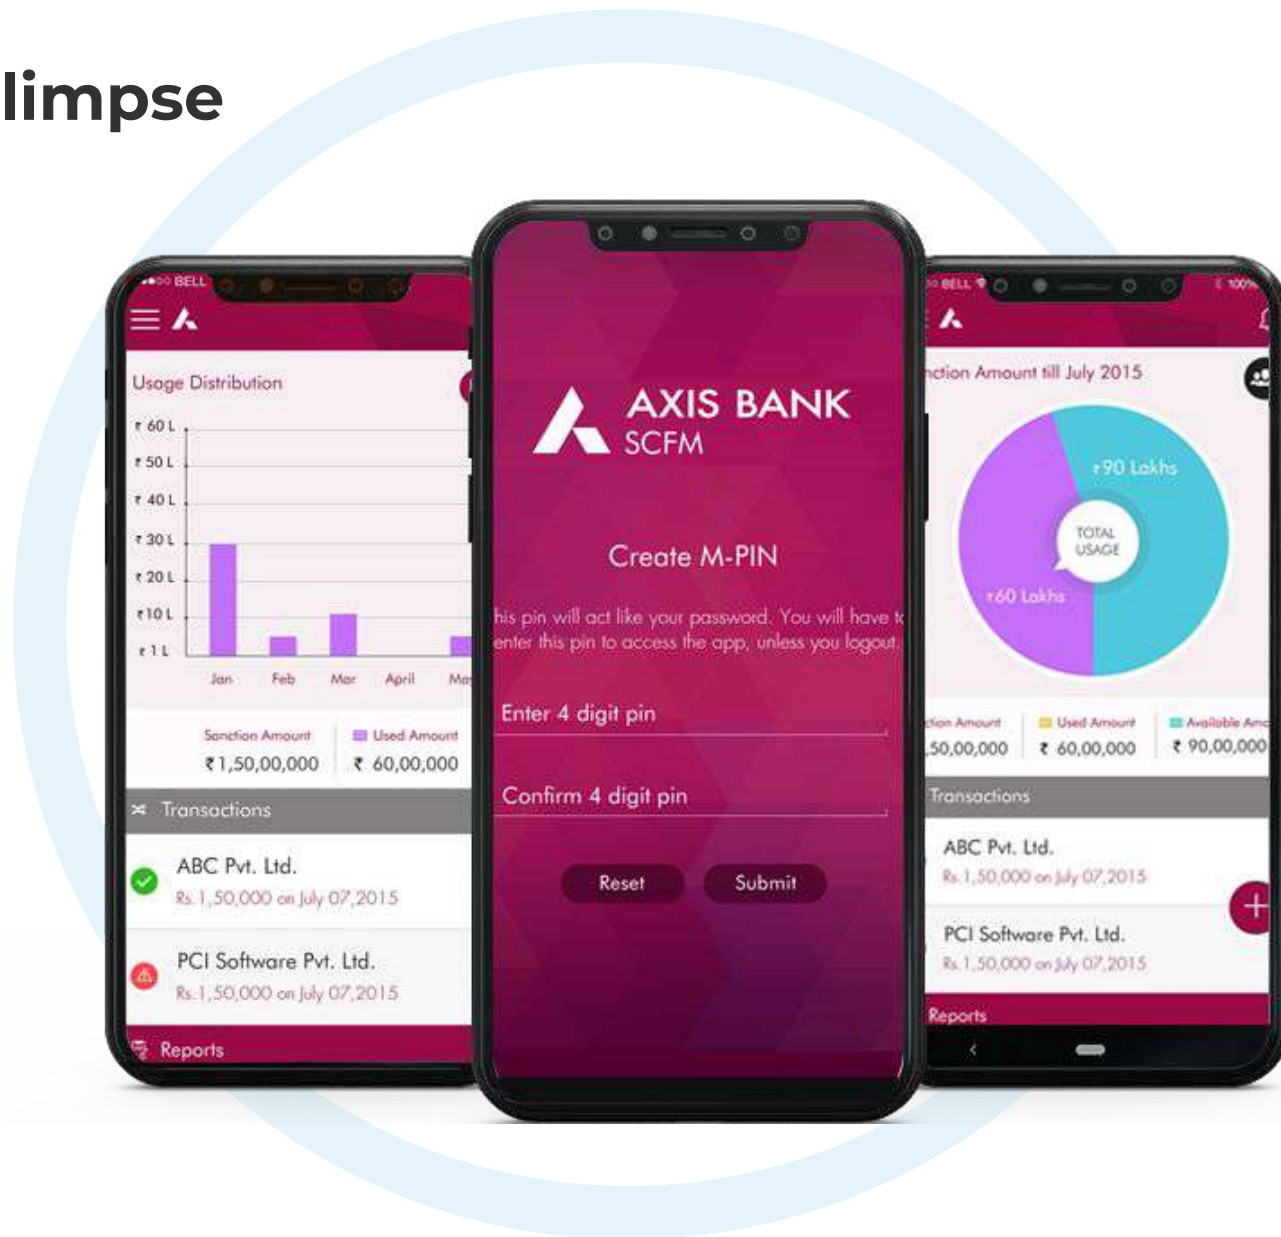

- PayPro Mobile App has provided Axis Bank with a secured mobile future. Statement, balance and report can be analysed in bar graphs and charts.
- The Mobile App encourages the customers to use the bank's current account instead of using any other banking solutions for customer retention.
- PayPro Mobile App is greatly useful for customers who have multiple current accounts.
- PayPro has an inbuilt session token that automatically logs out an account if the account remains inactive for some time.

The Impact

INT.'s PayPro mobile app ensures authenticated NEFT transactions along with safeguarding the transaction security.

- PayPro app assisted corporate customers to keep track of various transactions, salaries, expenditures and dividends.
- The MPIN feature is another unique feature of the PayPro app. Instead of repeated Login and Password, using MPIN makes the App protected.
- PayPro is built by retaining a fine balance between a smooth transaction system and a secured system.
- App classified the authorization batch-wise, transaction-wise and account-wise for making the App an easy-to-use tool.
