# PROBLEM STATEMENT

Somax, a B2B enterprise, was struggling with outdated legacy software that hindered operational efficiency and growth. The need to scale, integrate with modern tools, and reduce costs drove the need for full-scale modernization.

Outdated legacy system causing frequent **downtime and inefficiencies**.

**High maintenance costs** and difficulty in introducing new features.

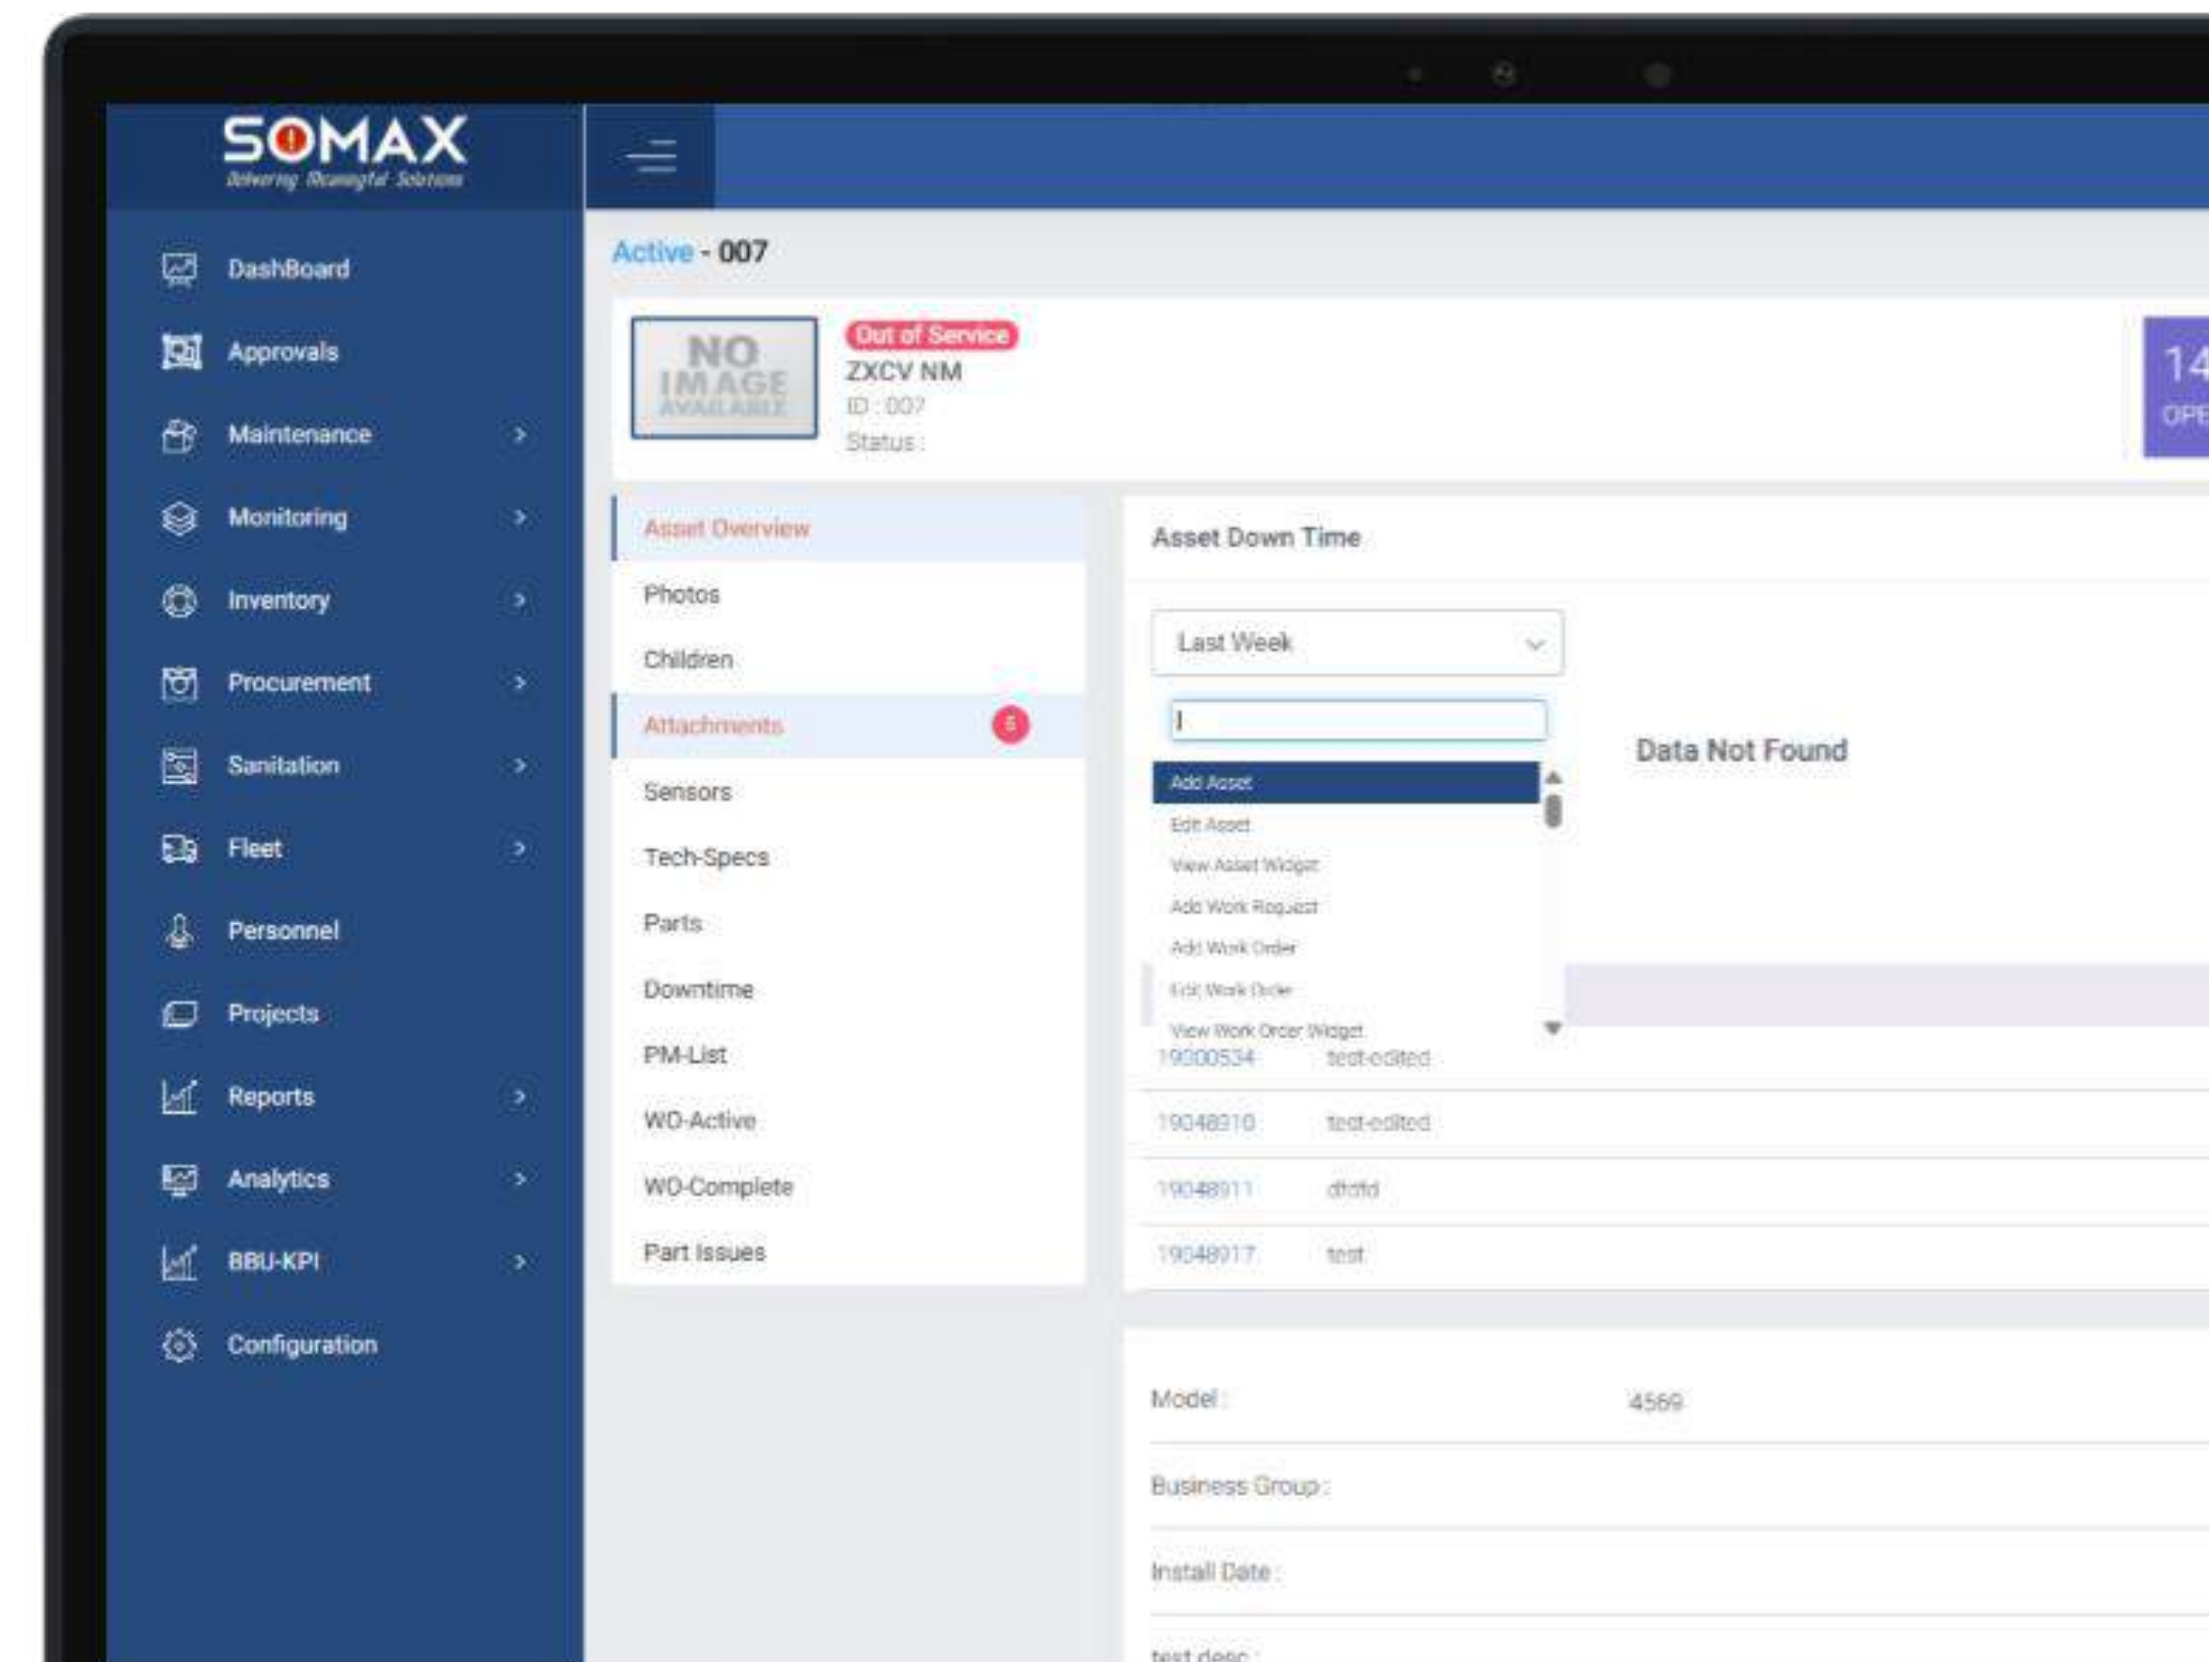

**Poor integration** with new technologies, limiting adaptability.

Inability to **scale operations** to meet growing B2B demands.

INT. implemented a **modern, future-ready system architecture** with a focus on scalability, intelligence, and automation:

- ✓ **Cloud-first migration** to support elasticity, real-time updates, and remote access.
- ✓ **AI-powered analytics** for predictive insights and informed decision-making.
- ✓ **Automated workflows** to streamline end-to-end B2B operations.
- ✓ **Secure API-driven integrations** enabling interoperability with modern platforms and services.

# INT. applied its **end-to-end modernization methodology**

## 01

### **Discover:**

Analyzed business processes and identified key system limitations.

## 02

### **Strategy and Planning:**

Selected the optimal technology stack, migration path, and security approach.

## 03

### **User-Centric Redesign:**

Focused on intuitive UX/UI with iterative prototyping and usability testing.

## 04

### **Agile Development:**

Deployed in sprints, ensuring continuous delivery and adaptability.

## 05

### **Testing & Deployment:**

Conducted comprehensive QA, followed by a smooth go-live with minimal downtime.

## 06

### **Post-Deployment Support:**

Provided 24/7 monitoring, optimization, and enhancement services.

**63%**

**faster transaction processing** through automation and cloud enablement.

**54%**

**reduction in maintenance costs** by eliminating legacy infrastructure.

**32%**

**increase in client satisfaction**, driven by improved reliability and user experience.

**3x**

**transaction scalability** with no additional infrastructure overhead.
